

COMPANY	HALL	STAND	DESCRIPTION / HIGHLIGHTS
ARBURG	13A13		INJECTION MOULDING EQUIPMENT Automation and assembly, two component LSR + Thermoplastic, three component moulding, fast speed moulding including IML, technical applications including many tooling highlights from Europe's best toolmakers. They will be presenting the electric Allrounder 370 A with the small, 70 size injection unit for the production of small and micro components.
STACKTECK	1D09		RITEMP SUPER COOLING TECHNOLOGY
MOLD-MASTERS	1A39		HOT RUNNER SYSTEMS Showcase the next generation Master Series and the Fusion Series , a feature packed large part solution. In addition also next generation of Accu-Line , a brand new electrical valve gating system and a new Hybrid System incorporating the benefits of the Fusion system with Master-Series sized nozzles, making it optimal for manufacturers operating with high shot weights.
STAUBLI	11H11		QUICK CONNECT COUPLINGS & MOULD CHANGE Demonstrating the new innovative Magnetic QMC122 system with hand held controller for easy & safe set-up. High flow RMI37 & CBI06 coupling for cooling circuits and RMP48 with improved flow for multi connection of hydraulic cores and valve gates.

BEAUMONT TECHNOLOGIES	13B59-8	IN-MOULD TECHNOLOGY Introducing its MeltFlipper® and MAX™ (multi-axis) technologies along with a sneak preview of BTI's upcoming in-mold adjustable rheological control systems (iMARC™).
PRIAMUS	10B04	IN-MOULD CONTROL AND MONITORING Priamus will show a modified version of the software " Priamus Shop Floor Control ". They will also introduce " Pass Controller ". The Pass Controller shows at a glance if a part is good or bad.
COPERION	14C33	Coperion W&P will exhibit the latest technology in Compounding featuring modular design. Also the latest Megavolume Plus extruder. Waesche will show the latest in bulk material handling system technology Coperion Keya Twin Screw extruders from China
CONAIR	10B74	DRYING, FEEDING AND BLENDING The very latest in precise control and energy efficient material drying technology
GHS		COMPLETE AUTOMATION SYSTEMS
WANNER	10H16	GRANULATION
BMB	13A33	INJECTION MOULDING EQUIPMENT Fast speed injection moulding applications
GROSSENBACHER	10H55	Temperature control units for high technical and quality requirements
PULSOTRONIC	10D64	Metal Detection/Metal Separation and Image Processing systems.
JOMAR	14A34	Injection and extrusion blow moulding
REDUCTION ENGINEERING	13C47-13	Pulverising and Rotational Moulding
SCHEER & CIE	9E37	Pelletising Systems
BIELOMATIC	11G60	Vibration and Laser welding systems
MAPLAN	16B45	New horizontal o-ring machine series "Cure ² " The self-optimizing rubber injection moulding New Touch Screen Controller - PC5000touch
MIXACO	9 E60	High-Speed Container Mixers
XALOY	12C34	Jet Cleaners and Screen-Changeers
